

**Colin Groom appointed to the position of Export Market Development Manager (ASEAN)**

Pacific Urethanes recently appointed Colin Groom to the position of Export Market Development Manager (ASEAN).

Colin will be based in Malaysia and will be responsible for developing our business in the ASEAN countries.

The PU market in these countries is growing at almost double-digit annual increases and offers good future growth prospects for Pacific Urethanes.

Our focus will be on the LNG industry, the panel market and spray foams.

**1:1 True PIR Spray Foam – Specially Formulated for the Spray Contractor**

Pacific Urethanes is pleased to announce their latest development of a true 1:1(v/v) mix ratio polyisocyanurate (PIR) spray foam.

This product boasts an impressive index of over 300 unlike other competitive products that are hardly more than PUR. This gives the foam a superior fire performance than those with a lower index.

The 1:1 mix ratio also means that this product is able to be processed through our customers standard spray equipment, such as a Graco EXP2.

This is the latest development in Pacific Urethanes impressive range of products for the spray contractor. These include closed and open celled spray foams, closed and open celled pour in place foams, hybrid and full polyurea coatings and our new range of Precision Lift concrete jacking products from Prime Resins.

Please call Peter Lloyd on 0439 732 619 for more information.

**Our New Website has been launched**

The recently launched new website for Pacific Urethanes will provide easy access for new and existing customers. Improved descriptions of the markets we serve along with an enhanced product range is now available online.

Our product data sheets (MSDS) are all available to be downloaded. Information with regard to our Business partners is also provided.
